

# Around

*\*Information below was pulled from [around.co](https://around.co)*

[Around](#) provides a unique video call option with an intent to help hybrid or remote teams collaborate and create.

## *Around Pricing plan*

Around is broken into three different price plans; Free, Pro, and Business. See the pricing details [here](#).

## *Around Features*

### *Dedicated workspace*

Around allows you to create dedicated “rooms” which allows you to have curated spaces for each of your teams, as well as the opportunity for different teams to meet in separate rooms at the same time. There is a 50 person maximum allowed for each call in any given room.

### *Connection and Collaboration*

Around is designed to make your team feel included and even more connected than before. With their specific echo prevention audio technology no one sounds far away or disconnected. This makes it easy to collaborate with your teammates in person without having to mute while in the same space.

### *Guests are free*

When working with outside organizations, Around lets you add “guests” or external participants can be let in for no additional cost. Guests will have all of the same features as the pro plan minus starting a new meeting or having recording capabilities.

### *Around on your phone*

Around is accessible on laptop, desktop, and mobile. Take your meeting on the go, easily switch from your desktop application to your mobile device by picking up the call on the desired application.

### *Around Filters*

Filter your video camera for a twist on your meeting.

### *Around in meeting games*

Take a break within your team and play one of their in applications games to take a break or loosen the vibe of a meeting.

### *Around and meeting vibes*

Around offers a number of in meeting “vibes” allowing you to add music, connect your systems audio like spotify or apple music, or choose from their list of music. Use this to create a central work space or focus area.

### *Around and Integration*

Around integrates with various applications like slack and google calendar. You are also able to start a timer, raise everyones hand in numerical order, use and share GIFs or Emojis, share a file, change the meeting view, start a chat, share your screen or record.

### *After meeting recap*

Around will send you an after meeting recap allowing you to see all files and chats that were shared as well as any significant meeting moments.

### *Minimum requirements to downloading Around:*

Mac	Requires MacOS Mojave or later
Window	Requires Windows 10
Linux	Requires modern Ubuntu, Debian, Fedora, CentOS, Red Hat, Arch Linux, openSUSE
Web Application (Not a download but compatibility)	For the web app, they support Google Chrome and the latest versions of Safari, Firefox, and Microsoft Edge.

### **Instructional Video:**

NIWRC has put together a short instructional video highlighting the various features that this application has in terms of communications efficiency. [Video Link.](#)
